

# Audit, Compliance & Data Intelligence (ACDI)

**Cutting-edge monitoring, reporting and data analytics software that, like a Swiss army knife, perfectly assists you with: Auditability, Evidence and Performance.**

Constantly knowing what is happening to your IAM-relevant data, being able to review and analyze it, as well as boosting overall efficiency, is what you get from ACDI.

**SKyPRO's ACDI** keeps you and your team in control 24/7 with full observability, simplifying policy enforcement and ensuring compliance.

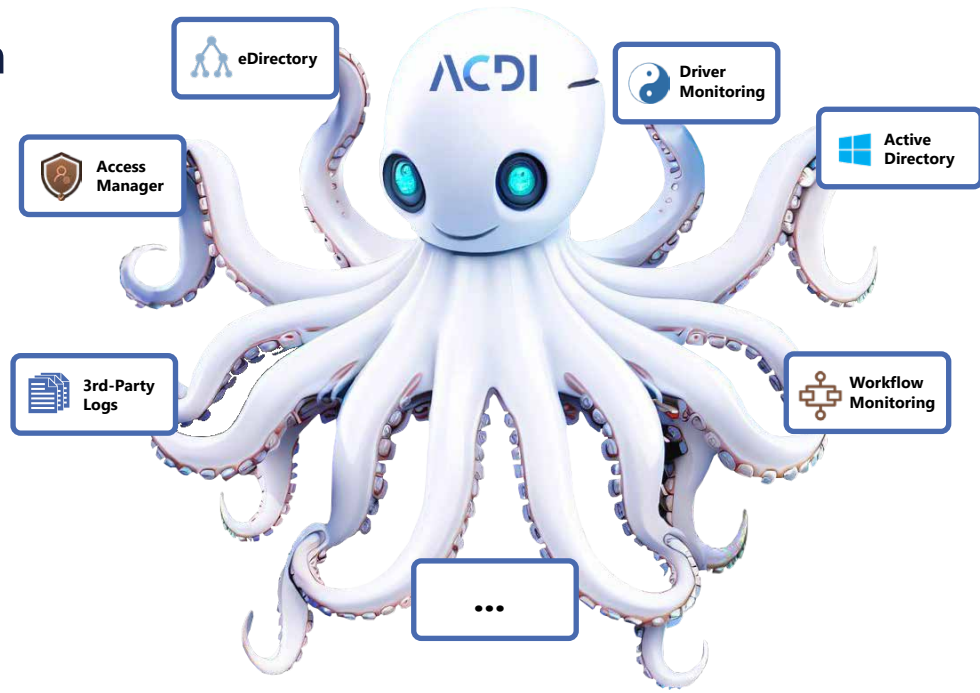

More on ACDI

# ACDI Identity-Driven Data-Kraken

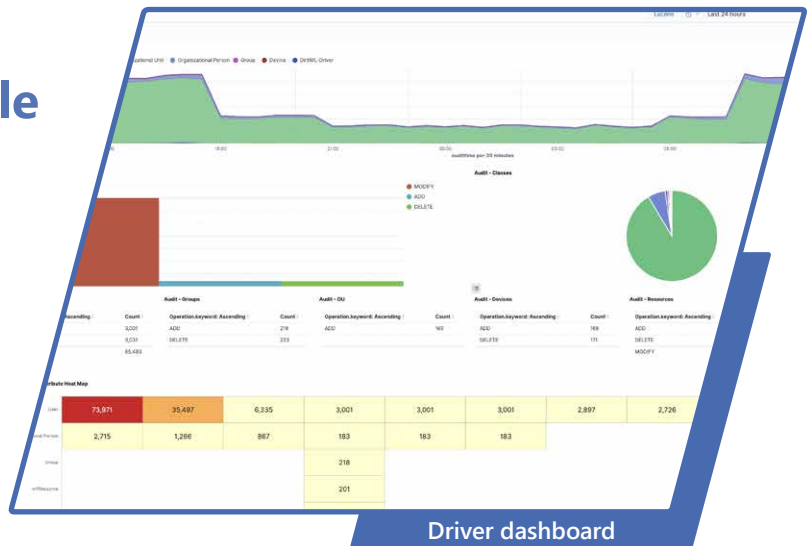

IT environments that require an identity and access management solution have data and information in multiple locations.

**ACDI** can access all the identity-driven data from all these sources and process it as you need. It can connect to eDirectory, Active Directory, Access Manager and more.

# IDM-Focused Real-Time Individual and Customizable Dashboards

- Real-time event tracking
- Live filtering
- Predefined dashboards
- Individual dashboards
- Role and User Management for ACDI functions & Data Obfuscation Options

## Benefits of ACDI

Avoid shutdown

Enhance transparency

Please auditors/requestors

Fill a product gap

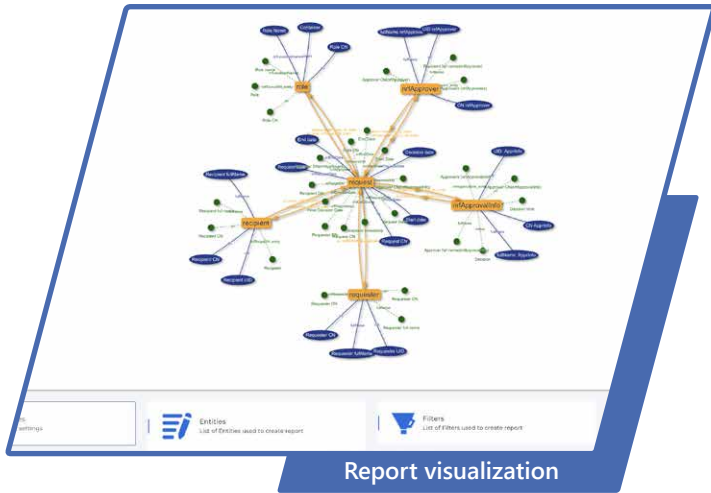

Ease the job

Extremely scalable

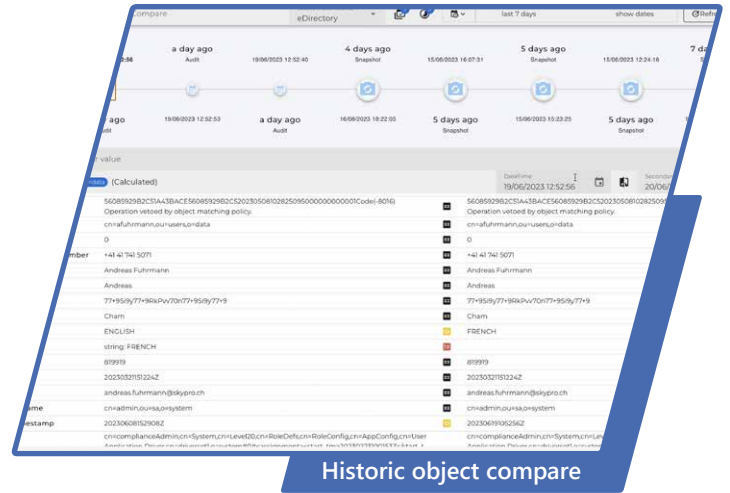

# Reporting Engine

- Intuitive creation and adjustment of reports
- Predefined and individual reports
- Graphic report visualization
- Report scheduling and automation
- Role and User Management for ACIDI functions & Data Obfuscation Options

# Time Machine

- Object history browsing
- Historic object compare
- Live content filtering
- Export historic object state
- Role and User Management for ACIDI functions & Data Obfuscation Options

## With ACIDI you get:

360-degree view of the relevant environment

real-time forensic analysis of ALL data, current and past

customizable reports to please requesters and auditors

automation of evidence processes

Whether you're working with Open Text NetIQ IDM or use Microsoft Active Directory, this is a must-have tool. With ACIDI, you constantly know what your data looks like and what your IDM system is doing, and can pull reports on all the data you and your requestors need.
