

# Audit, Compliance and Data Intelligence v4

## System Requirements

4-8 Core

Disk space depends on how often snapshots are being made and how many events take place. 100-200 GB free disk space is our recommended starting value

16-32 Gb

RH 8+, SLES 15+, Ubuntu 22+

Root

FW open port: 3190 (outside), 3190 from IDM to the ACD VM

\* For systems running high loads we recommend to use an OpenSearch (OS) cluster: OS recommends having at least 3 OS instances in the cluster. Add two VMs with OS with the same configuration.
