

FaxGwise 6 system requirements (FoIP)

Hardware:

- CPU: Intel® Core 2 or AMD Athlon® 64; 2 GHz or more
- RAM: not less than 2 GB for both server and client
- 2 Gb available hard disk space

Operating system (32-/64-bit):

- For Server:
 - Windows Server 2008 R2
 - Windows Server 2012
 - Windows Server 2012 R2
- For Client:
 - Windows 7 or higher

Software:

- In case of using Novell GroupWise as a mail platform, please install Novell GroupWise Client (version 8 or higher)
- In case of using Microsoft Exchange as a mail platform, please install Microsoft Outlook Client (version 2007 or higher)
-> We advise you to create a separate mailbox for FaxGwise Server
- PDF Reader

As you would like to test FoIP we will install you XCAPI driver. If you are going to use our server, please open the following firewall ports:

- 4000-4999 UDP
- 5060 TCP/UDP
- 5061 TCP/UDP

We need these ports to be opened for both inbound and outbound traffics.

If you would like to use your PBX, our technicians need the following information for appropriate configuration:

- Manufacturer, model of PBX
- SIP user name
- Domain (or IP) PBX
